

ABDUL SAMI GHURI

Backend & AI Engineer

Karachi | +92 321 2893105 | abdulsamig334@gmail.com | [GitHub](#) | [LinkedIn](#) | notaviq.com

PROFESSIONAL SUMMARY

Backend & AI Engineer specializing in scalable microservices, RAG pipelines, and production SaaS systems. Proficient in Python, Node.js, FastAPI, and LLM integration. Strong expertise in secure API design, distributed architecture, and cloud-native deployments achieving 99.9%+ uptime.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, Dart, SQL

Backend: Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, Microservices

AI/GenAI: LLM Integration, RAG Systems, Groq API, Transformers, LangChain, Agno, Prompt Engineering

Databases: MySQL, MongoDB, Firebase, Vector Embeddings

DevOps: Docker, Vercel, Render, Cloudflare, CI/CD

Tools: Git, Postman, Jest, Mocha, SonarQube

Frontend: React.js, Flutter,

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern — 10Pearls Shine Program

December 2025 – March 2026

- Engineered full-stack applications with React.js, Node.js, Express.js, MySQL; reduced technical debt 35% through Clean Architecture.
- Architected JWT-based authentication with role-based access control for secure data handling across microservices.
- Integrated LLM GenAI features automating 60% of repetitive workflows; improved user productivity significantly.
- Enforced code quality via Jest/Mocha testing (85%+ coverage) and SonarQube analysis; eliminated critical production bugs.

Software Developer Intern — Matz Solutions Pvt Ltd

July 2025 – September 2025

- Developed 8+ Flutter applications with seamless backend API integration using SQL and MongoDB.
- Optimized database queries and schema design; improved response time by 40%.
- Maintained 99.5% uptime across production services; supported deployment and backend maintenance.

KEY PROJECTS

Notaviq — AI-Powered Knowledge Management Platform

React | Node.js | Express.js | MySQL | Groq API | JWT — [Notaviq](#)

- Architected secure backend with JWT authentication, email recovery, and role-based access control.
- Integrated Groq LLM for AI-powered note summarization, auto-titles, semantic tagging, and conversations; reduced manual time 70%.
- Engineered distributed architecture on Vercel, Render, Aiven MySQL, Cloudflare; achieved 99.9% uptime.
- Solved production issues: reduced API latency 40%, optimized costs 45%, implemented concurrent autosave.
- Scaled to 80+ active users with 70%+ retention; live at notaviq.com

AI Dialogue Summarizer System

React | Python | FastAPI | Hugging Face T5 Transformers — [GitHub](#)

- Built FastAPI backend with T5 Transformers; handled 15+ concurrent requests with sub-second response times.
- Optimized inference via Beam Search decoding and GPU acceleration (CUDA/MPS); achieved 85% throughput improvement.
- Engineered preprocessing pipeline using regex; improved model accuracy 15%.

AI ATS Resume Analyzer

Python | React.js | Node.js | NLP (TF-IDF, Cosine Similarity) — [GitHub](#)

- Developed AI resume-to-job matching using TF-IDF vectorization and cosine similarity; 92% accuracy on 500+ pairs.

- Architected full-stack platform: React frontend with keyword highlighting + Node.js PDF processing APIs. •
- Reduced manual review time by 50% with real-time matching analysis and recommendation reports.

Mosque Locator — Geolocation Discovery App

Flutter | *Node.js* | *Express.js* | *MongoDB* | *Google Maps API* – [Frontend](#) | [Backend](#)

- Built cross-platform app with geolocation services; integrated Google Maps API for real-time location accuracy. •
- Engineered custom Node.js backend for high-speed spatial queries with efficient geolocation search. •
- Optimized UX with offline caching and responsive design; reduced app load time by 30%.

EDUCATION

BS Software Engineering — Mohammad Ali Jinnah University

CGPA: 3.58/4.0 | *Graduation: January 2027*

Advanced AI & Machine Learning Specialization — Apna College

ACHIEVEMENTS

- 4x Merit Scholarship Recipient — Outstanding academic performance
- 2x Director's Award Recipient — Exceptional project contributions
- GDG Kolachi Hackathon Participant — AI/ML and full-stack development
